SUMMARY

Motivated Flutter Developer with practical experience gained through coursework, internships, and hands-on projects building cross-platform mobile applications for Android and iOS using Flutter and Dart. Proficient in building responsive UI components, integrating REST APIs, and managing application state using Provider. Skilled in leveraging Firebase services and native Android integration (Java). Strong foundation in version control using Git and GitHub, clean coding practices, and problem-solving. Seeking an opportunity to deliver clean, scalable, and maintainable mobile code.

SKILLS

- **Languages:** Dart, Java (Native Android)
- **Frameworks & SDKs:** Flutter SDK
- **State Management & Architecture:** Provider, Clean Architecture principles
- **Backend & Integration:** REST APIs, Firebase (Auth, Firestore), JSON Integration
- **Tools & Version Control:** Git, GitHub, VS Code, Android Studio, Flutter DevTools

EXPERIENCE & PROJECTS

Path-X – AI-Powered Career Guidance Application **[Live Demo]** | **Aug 2025 – Present**

- Designed and developed responsive, reusable UI screens across Android and iOS using Flutter and Dart.
- Integrated REST APIs to display real-time career guidance data and handled loading states and error handling efficiently.
- Utilized Provider for global state management to handle smooth navigation and data flow across screens.

Meta Dex – Pokémon Battle Simulator & Pokédex Platform **[Live Demo]** | **Jan 2025 – May 2025**

- Developed an automated battle simulation engine capable of simulating 100 battle iterations to calculate matchup win rates and outcome analytics.
- Integrated an interactive Pokédex lookup with stat analysis, move-set evaluations, and type advantages to assist players in competitive strategy.

Streak Mate – Habit & Productivity Tracking Application **[Play Store]** | **Jul 2024 – Dec 2024**

- Integrated Firebase Authentication and Cloud Firestore for secure user accounts and database storage.
- Managed code quality and team collaboration using Git and GitHub branch management, pull requests, and code reviews.
- Prepared, debugged, and tested the application for deployment on the Google Play Store.

Tamilcraft.in – Minecraft SMP Creator Platform **[Website]** | **Feb 2024 – Jun 2024**

- Designed and deployed a responsive web platform dedicated to a Minecraft SMP content creator, enhancing community engagement and information sharing.
- Streamlined server updates, announcements, and user navigation through modern web performance practices.

EDUCATION

Bachelor of Technology – Artificial Intelligence and Data Science **Sep 2022 – May 2026**
Excel Engineering College | CGPA: 8.5

Higher Secondary Certificate (83.3%) & SSLC (89%) **Jun 2020 – Apr 2022**
Vani Vidyalaya

CERTIFICATIONS

- **Introduction to Flutter & Dart Programming (Certification)** – Udemy **Jan 2024**
- Application Development – Breakout Zone **Nov 2023**
- Android Application Development – Great Learning **Oct 2023**
